

What is our Ocean Passage Making Class About?

Yacht Preparation and Departure

Use Celestial Navigation

Catching Dinner While Underway

Learn skills required to safely sail offshore for an extended period while accompanying us as we move our teaching vessel, Gallivant to the Caribbean in the fall and back in the spring. 9-13 day, live aboard classes, which provide students with an understanding of yacht preparation for ocean sailing, course planning, working a watch schedule, use of celestial navigation, weather analysis, storm avoidance, heavy weather sailing techniques including use of drogue and storm jib, use of radar, techniques for crossing the Gulf Stream, and other elements involved in ocean passage making. All classes taught by an ASA certified and USCG licensed captain.

Spring Schedule: St. Thomas, USVI to Fort Lauderdale, FL- 970 nautical miles, 9 Days. This class is expected to have favorable wind directions and since we stay south the weather is expected to be warm the entire passage.

Jacksonville, FL to Norfolk, VA to Rock Hall, MD, 760 nautical miles, 9 Days. Students can earn either ASA106 or ASA108 certification or both ASA106/108 on this nine day ocean passage and coastal cruise. After departure from Jacksonville, students ride the Gulf Stream north and maybe sail at 9-10 knots when combining the Gulf Stream current with favorable winds and/or we may jump inside and take the Inter Coastal Waterway part of the way and then jump back out as weather allows. Then after we arrive in Norfolk enjoy the sail up the Chesapeake Bay back to our home port in Rock Hall, MD. Students who don't already have ASA105 and ASA107 can do a home study and then take the exams during the class for just \$299 more for each home study.

Fall Schedule: Norfolk, VA to Saint Thomas, USVI- 1450 nautical miles, 13 Days. Join us for this passage as we sail directly across from Norfolk, VA to St. Thomas.

See dates on course page and schedule page of our website.

Land Ho

Prerequisites: In order to get certified to ASA108 Ocean Passage Making students must have already completed ASA101, ASA103, ASA104, ASA105, ASA106, and ASA107. Students who have ASA101-ASA105 but not ASA107, can get certified to ASA106 Advanced Coastal Cruising. It is also possible to participate in the ocean passage making classes as a non ASA Certification candidate. Students without the required ASA prerequisites must submit a sailing resume showing that they are well prepared for an ocean passage.

Our Ocean Passage Making Classes are real passages and students are subject to the same constraints that anyone would experience on an ocean passage.

Ocean passages are subject to weather and boat repair related delays. If our weather router says we need to depart at a later date due to adverse weather, we could be delayed until the weather clears. It is also possible that we could experience some boat related issue and be delayed while repairs are made. Before signing up for an ocean passage potential students should make sure their schedule is flexible enough to allow them to depart and/or arrive later than our published schedules. No refunds are given due to weather or boat repair related delays.

By paying for an ocean passage making class you acknowledge that you have been informed of this policy.
